

Obtaining a League Website Account - Where an Email Invitation has Been Received.

Background

Each season, teams (coaches and managers) require LCMHL website accounts (aka Team Admin Accounts) to perform the following:

- Enter team rosters
- Enter team staff contact information
- Enter game results
- Optionally, create other team admins (e.g. backup manager, game result posting volunteer)

The account creation process involves 2 parts, the first of which is performed by a league statistician and the second part is performed by the account recipient.

Part 1 - League Statistician

Association convenors provide league statisticians with contact information for each coach and manger of a team. The statistician will set each up as a team admin. This creates an association only.

At this point, the coach/manager will not have an account. However, the statisticion's actions will cause an account invitation to be emailed to the recipient.
